

Children's Hospital Colorado

Physician Relations

Lunch & Learn topics

Children's Hospital Colorado's Physician Relations team coordinates educational Lunch & Learn program sessions. The program brings Children's Colorado's surgeons and specialists to community practices and clinics for an hour presentation on the most current pediatric topics.* Presentations can be reported as self-documented continuing medical education.

To schedule a Lunch & Learn session contact the Physician Relations Representative in your area.

**Lunch & Learn programs are dependent on the speakers' availability. Please give us as much advance notice as possible to help us coordinate schedules. Thank you.*

Adolescent Medicine

- Adolescent gynecology
- Eating disorders
- Prenatal care

Allergy, Immunology and Rheumatology

- Allergic, hypersensitivity and immune deficiency disorders
- Asthma Care Pathway
- Chronic fatigue syndrome
- Rheumatic and muscular diseases

Anesthesiology

- Anesthesia care pre- and post-op
- Chronic pain
- Pediatric cardiac anesthesia
- Procedural sedation
- Procedures on children with sensory issues

Audiology, Speech Pathology, Language and Learning Services

- Assessment and Identification of Learning Disorders
- Augmentative and Alternative Communication – what is it and when do we apply these techniques
- Cochlear implants in children
- Early identification and hearing loss detection
- Early intervention for speech or language disorders – how & when?
- Feeding Disorders
- Newborn hearing screening; follow-up, diagnosis and intervention

Burn Program

- Heat contact burns
- Juvenile Firesetters Program
- Large surface area burns
- Burn Camp

Cancer (Center for Cancer and Blood Disorders)

- Abnormal CBC: when to suspect leukemia
- Anemia: how to evaluate and treat and when to refer
- Bleeding disorders in children
- Bone marrow transplantation
- Childhood cancers
- Coagulation disorders
- Evaluation of lymphadenopathy
- Evaluation of the child with an abdominal mass
- Hematopoietic growth factors
- Hemophilia
- How to communicate bad news
- Late effects: You're cured of cancer, now what? Late effects in long term survivors of childhood cancer
- Leukemia update
- Managing sickle cell disease in your practice
- Role of PET scanning in pediatrics
- Role of bone marrow transplant in pediatric disorders
- Sickle cell anemia
- Supporting families when their child is dying
- When to suspect cancer

Cleft Lip and Palate Program

- General topics

Clinical Genetics and Metabolism

- Autoimmune disorders
- General topics
- Genetics
- Inherited metabolic diseases
- Neurofibromatosis

Critical Care

- General critical care topics
- Single- and multi-organ failure

Dental Surgery

- Dental fear and anxiety
- Dental services for underserved kids: Healthy Smiles Clinic
- Oral and maxillary surgery
- Oral care for children with special needs
- Traumatic injuries to the mouth and teeth

Dermatology

- Advances in laser therapy
- Atopic dermatitis
- Genetic skin disorders
- Pediatric Dermatology Tidbits and Tips
- Pigmentary disorders
- Vascular malformations

Developmental Pediatrics

- Autism
- Developmental disorders
- Feeding problems and interventions
- General child development
- Infants at risk for adverse neurodevelopmental outcomes
- Sleep disorders

Emergency Medicine

- Abdominal emergencies
- Acute respiratory emergencies
- Bronchiolitis
- Common pediatric overdoses
- Evaluation of extremity trauma: sprains, strains and fractures
- Evaluation of "high-tech" patients
- Evaluation of minor closed head injury in children
- Evaluation of the irritable child
- Laceration and wound care
- Management of dehydration and oral rehydration therapy
- Management of diabetic ketoacidosis
- Management of status epilepticus
- Pain management and assessment of the pediatric trauma patient
- Pediatric fever
- Pediatric sedation
- Prehospital care of the injured child

Endocrinology

- Ambiguous genitalia
- Childhood obesity
- Growth disorders including short stature
- Hypoglycemia
- Metabolic Syndrome
- Osteoporosis in childhood cancer survivors
- Problems in pubertal development
- Type I diabetes
- Type II diabetes

Epidemiology

- Immunizations
- MRSA
- Population-based epidemiological studies including outcome and cost analysis
- State of the health of Colorado's children
- Urinary Tract Infections (UTIs) treatment and management

- Vaccinations
- Vaccine preventable diseases

Gastroenterology

- Biliary and pancreatic disorders
- Childhood Obesity and Dietary Lipids
- Complex disorders of nutrition
- Complex disorders of the gastrointestinal tract, liver and pancreas
- Inflammatory bowel diseases
- Liver transplantation

Genetics

- General topics
- Newborn screening for metabolic disease

Gynecology, Adolescent

- Abdominal pain, pelvic endometriosis
- Birth defects or injuries involving the reproductive organs
- Chronic genital rashes or itching
- Contraception
- Heavy, frequent or painful menstrual periods
- Ovarian cysts or pelvic masses
- Signs of delayed sexual maturation
- Signs of precocious sexual maturation

Heart Institute

Cardiology

- Adult congenital heart disease
- Atrial and ventricular arrhythmias
- Blood flow research
- Catheterization, new procedures
- Congenital heart disease
- Marfan's Syndrome
- Murmurs
- Pulmonary hypertension
- Synapse

Cardiothoracic Surgery

- Complexity scoring, statistical analysis of congenital heart conditions
- Congenital heart disease
- Pediatric heart transplant

Infectious Disease

Viral Diseases

- Congenital infections
- Cytomegalovirus (CMV) infections
- Epstein Barr Virus (EBV)
- Emerging infections (Monkeypox, MRSA, SARS, etc.)

- Enterovirus
- HIV issues
- HIV update for the PCP
- Pediatric HIV for infectious disease fellows
- Prevention of neonatal HSV Infections
- Influenza
- Mad Cow Disease
- MMR and Autism
- RSV
- Smallpox
- Varicella Virus
- Global programs for reducing childhood deaths: The World Health Organization
- West Nile Virus

Bacterial Diseases

- Antibiotics
- Bacterial Enteritis and HUS
- Bone and joint infections
- Chronic Fatigue Syndrome
- Deep neck space abscesses
- Food safety
- FUO (Fever of unknown origin)
- Germ-proof your patients – beyond antibiotics and vaccines
- Group A Strep Disease
- Infectious disease emergencies
- Bad luck or bad immune system – When and what to worry about
- Immunizations – new vaccines
- Infection control and your office
- Kawasaki Syndrome
- Lymphadenitis
- Masqueraders of infectious diseases
- Meningococcal infections
- MRSA
- Pet related illnesses
- Periodic Fever Syndromes
- Pertussis
- Pneumococcal vaccine
- Could you take a look at this rash? Differential diagnosis of red rash and vesicular rashes)
- Severe invasive strep
- Sexually Transmitted Diseases
- Tuberculosis
- Toxic Shock Syndrome
- Urinary Tract Infections (UTIs) treatment and management

Injury Prevention

- Bike and helmet safety
- Child passenger safety
- Coalition building
- General injury prevention with local data
- Home safety
- Learn about Safe Kids Coalition
- Pedestrian safety
- Program development

Neonatology

- Fetal alcohol syndrome
- Fussy babies and infant irritability study
- Stabilizing the premature/sick infant for transport

Nephrology

- Medical management of the kidney transplant patient
- Renal disease
- Renal replacement therapies, hemodialysis and peritoneal dialysis

Neurology

- Concussion assessment and management program
- Neurological and neuropsychological evaluation
- Pediatric epilepsy

Neurosurgery

- Craniofacial surgery
- CT Interpretation for pediatric trauma patients
- Emergency management of head and neck injuries in children
- Hydrocephalus
- Pediatric brain and spinal tumors
- Psychosocial survivorship issues: the parents perspective
- Surgical treatment of pediatric epilepsy
- Tethered cords

Nutrition

- Growth and feeding problems, including failure to thrive and tube feeding
- Neonatal nutrition
- Pediatric obesity

Ophthalmology

- Amblyopia and lazy eye
- Common eye problems in the outpatient setting
- Congenital cataracts
- Congenital glaucoma
- Cornea donation/transplant
- Hereditary eye diseases

- Retinopathy of prematurity
- Strabismus
- Vision screening

Otolaryngology

- Chronic sinus infection
- Evaluation of upper airway obstruction
- General ENT issues (tonsils, adenoids, breathing)
- Sleep disorders
- Voice disorders

Orthopaedic Surgery

- Bone and joint infections
- Bone tumors
- C-Spine injuries in children
- Casting clinic
- Cerebral palsy
- Clubfoot
- Disabled sports program
- Fractures and musculoskeletal trauma, including sports injuries
- Gait disorders
- Hip dysplasia
- Juvenile arthritis
- Knee Injuries in Pediatrics and Adolescents
- Overuse Injuries in Young Athletes
- Scoliosis
- Spina bifida
- Sport-related injuries in the pediatric and adolescent patient
- Surgical conditions of the spine

Pediatric Surgery

- Adolescent Bariatric Surgery
- Bowel Management Program (Colorectal and Complex Pelvic Floor Disorders Program)
- Chronic and acute abdominal pain
- Common inguinal, scrotal and Genital disorders in Children
- Controversy in the diagnosis and treatment of appendicitis
- Evaluation of the surgical abdomen in children
- Gastrointestinal bleeding in kids
- Gastroesophageal reflux
- Head and neck, lumps and bumps
- Hernias and undescended testes
- Inflammatory bowel disease and polyposis
- Inguinal and Scrotal Disorders
- Kasai procedure for biliary atresia

- Liver and kidney transplantation
- Liver and spleen injuries in children
- Minimally invasive surgery in children
- Neck masses in children
- Neonatal surgical emergencies
- Numerous pediatric trauma topics
- Nuss procedure for correction of pectus excavatum
- Pediatric bowel obstruction
- Pediatric head and neck disorders
- Pediatric transplantation
- Prenatal surgical disorders
- Solid abdominal tumors
- Surgical conditions of the chest
- What's new in pediatric surgery

Psychiatry and Behavioral Sciences

- Anxiety and mood disorders
- Autism
- Concussion assessment and management program
- Cutting
- Diagnosis and management of ADHD, ODD and CD
- Eating disorders
- Medical illness impact on emotional functioning
- Psychopharmacology
- School refusal and phobias
- Suicide and suicidal ideation

Plastic and Reconstructive Surgery

- Burn surgery
- Cleft lip and palate repair
- Craniofacial surgery
- Treatment of acquired, congenital or traumatic deformities
- Vascular malformations

Pulmonary Medicine

- Airway anomalies and diseases
- Apnea and sleep disordered breathing
- Asthma
- Cystic fibrosis
- Pulmonary hypertension
- Vascular disease

Rehabilitation

- Acute medical issues in children with disabilities
- Adapted sports programs for kids with disabilities
- Care of children with Cerebral Palsy
- Concussion management
- Gait abnormalities in children
- Torticollis/plagiocephaly
- Traumatic brain injury update

Trauma Program

- Anesthesia for the pediatric trauma patient
- Animal bites
- Blunt abdominal trauma
- Cervical spine injuries in children
- Driveway crush injuries: the most lethal mechanism of blunt trauma in children
- Emergency management of airway in children
- Initial management of the injured child
- Injury prevention
- Lap belt injuries
- Non accidental trauma
- Pediatric vascular trauma
- Spinal cord injuries in children
- Traumatic brain injury update

Urology

- Anorectal and neurological incontinence
- Congenital abnormalities of the genitourinary tract
- Deflux: treatment for vesicoureteral reflux
- Dry Time Clinic: behavior modification for bedwetters
- Genitourinary malignancies
- Prenatal Hydronephrosis
- Urology issues, general (circumcision, enuresis, reflux)
- Urinary Tract Infections (UTIs) treatment and management

Other pediatric topics

- End of Life Ethical Issues in Pediatrics
- How to develop an effective telephone triage and advice system for your office
- How to help your patients stop smoking
- How to prepare your office to handle unexpected emergencies
- Injury in children with disabilities
- Medical activism
- Patterns, pitfalls and prevention
- Pediatric issues in family medicine
- School phobias and sleep problems
- Tar Wars: Helping kids say no to Camel Joe
