Late Breaker: Overall, COVID-19 cases continue to decline in Colorado and throughout the U.S. However, cases continue in pediatric populations, particularly in adolescents. Thankfully, patients aged 12 year and older are now eligible to receive the Pfizer vaccine. As nonpharmaceutical interventions are being lifted, we are starting to see a rise in other seasonal respiratory viruses. Importantly, we have seen a gradual increase in RSV positive patients over the past two weeks and the CDC is reporting increased RSV case detection nationwide.
