Late Breaker: Circulation of SARS-CoV-2 has declined in Colorado over the last week. We all need to continue to counsel our patients and colleagues to continue critical public health measures including staying at home and getting tested when sick, social distancing, avoiding large gatherings, good hand hygiene, and wearing masks when in public. This is particularly important as students start to return to school. The CDPHE has recently released new guidelines regarding testing and school exclusion for school aged children (http://www.cde.state.co.us/planning20-21/healthguidancebycovidphase) and we developed a FAQ for parents as they navigate the complexities of schools reopening (https://www.childrenscolorado.org/conditions-and-advice/parenting/parenting-articles/back-to-school-coronavirus-FAQ/).
