Late Breaker: COVID-19 cases in Colorado and around the country continue to decline. The state test positivity rate fell to 7% this past week. The number of monkeypox cases in Colorado and in the US continue to rise with 183 cases reported in CO and over 14,000 cases reported throughout the US. Nationwide there have been 13 cases reported in children 0 – 10 years old. In addition to CDPHE, several commercial laboratories offer monkeypox testing including Aegis Science, Labcorp, Quest Diagnostics, and Sonic Healthcare.
