Children's Colorado Connect for Educational Audiologists:
Improving communication between your child's audiology team at Children's Hospital Colorado and your child's Educational Audiologist.

Need more information?
Talk to your child's Educational Audiologist

Why should I give consent?

_Educational Audiologists are an important part of your child's extended healthcare team. Children's Colorado Connect allows them to have access to up-to-date and accurate information_
Our Pledge
To make sure your child’s audiologists and the school Educational Audiologists have the tools to work together to give your child the best possible care. The right information, at the right time, to the right healthcare team members.

What is Children’s Colorado Connect?
Children’s Colorado Connect is a secure web-based portal system allowing Educational Audiologists access to Children’s Hospital Colorado’s electronic health record (EHR) to:

- Find audiology encounters for children who are treated at Children’s Hospital Colorado
- Obtain information about the child’s hearing history, healthcare plans in regard to their hearing, and most importantly the child’s audiograms
- See the members of your child’s healthcare team to help coordinate care for the child at school

What can the Educational Audiologist see in my child’s medical record?
- Documentation by Children’s Hospital Colorado audiologists and audiology assistants
- Procedures performed by a Children’s Hospital Colorado Audiologist
- Visit documentation in the audiology department at Children’s Hospital Colorado
- Audiograms

What is restricted from the Educational Audiologist
- Documentation and procedures by all other healthcare providers at Children’s Hospital Colorado
- Notes marked as sensitive by a provider

Is Children’s Colorado Connect secure?
Children’s Hospital Colorado grants access to educational audiologists who:
- Are registered users who sign a Security User Agreement
- Understand and obey all applicable state and federal privacy laws
- Complete training on appropriate use of Children’s Colorado Connect

Having access to serial audiograms has been priceless. This direct access has taken the guesswork out of student’s clinical care, and ensures we are providing the most appropriate support for them in their learning environments.
