

Camps: Keeping You Healthy

Our top priority at summer camp is keeping your child healthy and safe so they can focus on sunshine, the great outdoors, friends, and fun!

Our safety measures and prevention strategies may change based on the number of cases of illness (such as COVID) in the community before camp. We'll contact you 1-2 weeks before to camp to let you know about any changes.

Social Distancing

Weather cooperating, we will be spending as much time as possible outdoors to allow for social distancing and fresh air. We may require masks during activities where there will be close contact with others.

Hand Hygiene & Cleaning

Hand hygiene is very important. We encourage good hand washing during transition of activities, at mealtimes and often throughout the day. In partnership with Easterseals Colorado there will also be frequent cleaning of facilities. Individual supplies will also be available as much as possible.

Health Screening

Stay home if you're sick or have symptoms of COVID or test positive for COVID. We may require a daily health screening while you're camp, based on the number of COVID cases at the time of camp.

Masks

Masks won't be required unless doing an activity with close contact for long periods of time. All unvaccinated campers will need to wear masks inside. If campers have any symptoms such as a runny nose or sneezing, they may need to wear a mask. Our requirements on masks may change based on the number of COVID cases at the time of camp.

Vaccinations

We highly encourage vaccinations and boosters for all eligible campers, including siblings. If you're not up to date with your COVID vaccines, you'll need to wear a mask inside.

Testing

We won't require testing before attending camp. However, this may change based on the number of COVID cases at the time of camp. Families may self-test before arriving for camp, in order to determine your risk of spreading COVID-19, but it is not required.

The above guidelines were created based on the CDC recommendations for small and large gatherings (<https://www.cdc.gov/coronavirus/2019-ncov/your-health/gatherings.html>)
