February 11 - 27 th , 2019:	Interviews scheduled
March 4 - 8 th , 2019:	Positions offered, prompt confirmation of acceptance/declination requested

Supervision

The goal of supervision is to support the extern during exposure to new patient populations, assessment tools and intervention strategies, and to build feelings of competence and functional autonomy in areas of strength. Weekly reflective group and individual supervision as well as monthly didactics related to perinatal mental health will be provided. Quarterly supervision with the Clinical Director will also be provided. Additional supervision and consultation will be provided as needed, and is directly related to working within a perinatal mental health setting.

DUTIES OF PSYCHOLOGY TRAINEES

- Providing therapeutic evaluation and treatment to patients (mothers) and their very young children in the Healthy Expectations Clinic at Children's Hospital Colorado.
- **Ages:** Adult women of child-bearing age and their infants/toddlers
- **Typical responsibilities include:** Assisting with returning calls to the clinic Warmline and completing telephone triage and therapeutic support from first contact, developmental screenings and early identification of developmental concerns in infants/toddlers, relationship-based therapeutic assessment, providing treatment to women experiencing depression and/or anxiety during pregnancy or the postpartum period and their very young children. Treatment experiences include individual support of mother-baby dyads, co-leading mother's group, leading mother-baby dyadic group.

Healthy Expectations Perinatal Mental Health Clinic at Children's Hospital Colorado supports pregnant and postpartum women and their families who are struggling with mood and anxiety issues. The Healthy Expectations program is recognized as the Rocky Mountain leader in perinatal mood disorders treatment for pregnant and postpartum women. With free group support and evidence-based psychotherapy, Healthy Expectations draws upon experts from various medical and mental health disciplines including psychiatry, psychology, pediatrics, nursing and social work. Conditions treated include depression, anxiety, OCD, and bipolar mood disorder during pregnancy and the postpartum period, previous grief/loss/infertility and its impact on current pregnancy or parent-infant relationship, partner relational issues, birth trauma, and other parent-infant relational issues within the context of perinatal mental health. The program provides evaluations for medical, psychological, and/or social approaches during the perinatal period. Healthy Expectations Clinic offers a free weekly mom-to-mom support group as well as initial therapeutic warmline support, individual counseling, couples counseling, group therapy, and mother-infant support billed through insurance for mothers in the postpartum period. For pregnant mothers, a weekly topic-based support group also billed through insurance is offered.

Type of clients served on this externship

The Healthy Expectations Perinatal Mental Health Program at CHCO was designed to serve pregnant and parenting women at least 18 years of age and their infants or very young children. Partners of these women are encouraged to participate in services provided.
