Late Breaker: We have had a few specimens positive for influenza A this past week, which raises the possibility of a potential early influenza season. This is a great reminder that now is the time for everyone to get their influenza vaccination. The APP recommends annual influenza vaccination for everyone 6 months of age and older without medical contraindications. Updated guidelines for the 2025-26 season can be found at: <https://publications.aap.org/pediatrics/article/doi/10.1542/peds.2025-073620/202845/Recommendations-for-Prevention-and-Control-of?autologincheck=redirected>.
