**Late Breaker:** Our Microbiology Laboratory’s 2018 “Bugs and Drugs” is now available at [https://info.childrenscolorado.org/dept2/home/LAB/Documents/2018\\_DrugsAndBugs\\_Handbook.pdf](https://info.childrenscolorado.org/dept2/home/LAB/Documents/2018_DrugsAndBugs_Handbook.pdf). This annual publication summarizes the most recent antibiotic susceptibility patterns of the bacteria recovered from our patients’ clinical specimens. It also contains information about the tests we offer, pathogen recovery rates, tips for good specimen collection, and CDC’s current recommendations for influenza treatment and prophylaxis (which will come in handy soon!) CDPHE now publishes a similar statewide summary at <https://www.colorado.gov/pacific/cdphe/hai-data>. These local resources should be very useful aids to diagnosis and treatment of infectious diseases!
