Late Breaker: April is STI awareness month! In 2017, Colorado reported a 23% increase in the number of cases of chlamydia, 182% increase in the number of cases of gonorrhea, and a 61% increase in the number of cases of syphilis since 2013. About half of all new STIs occur in young people 15-24 years of age. Remember to Talk, Test, and Treat. For more information please see: https://www.colorado.gov/pacific/cdphe/sti-hiv (CDPHE website) or https://www.cdc.gov/std/sam/talktesttreat/individuals.htm (CDC website).
