Late Breaker: Cases of COVID-19 in Colorado continue to rise with a reported 12.6% test positivity this past week. In some good news, the FDA is scheduled to meet this week to discuss amending the EUA of the Moderna COVID-19 vaccine to include the prevention of COVID-19 in children 6 months through 5 years of age (2 dose series) and the EUA of the Pfizer-BioNTech COVID-19 vaccine to include children 6 months through 4 years of age (3 dose series). Analysis released ahead of the meeting have stated that both vaccines have been demonstrated to be “safe and effective” in this age group.
