

Safety Store

Children's Hospital Colorado
Here, it's different.™

We've got you covered

You may be surprised to learn that preventable injuries pose the greatest threat to the health of Colorado kids. These injuries range from falls and drowning, to burns, suffocation, poisoning, and car crashes, and are the leading causes of emergency department visits from the time they're born through their teenage years. The important thing to remember about preventable injuries, however, is that they're preventable. They are not accidents. We can do things to stop them, to make sure kids get the chance to be creative and play; the chance to fall down, and get back up. Most injuries can be prevented with the correct and consistent use of safety products such as smoke alarms, bicycle helmets, and car seats. However, with hundreds of different types of products on the market, including a growing assortment of 'childproofing' items such as cabinet locks, outlet covers, TV and furniture straps and window guards, knowing which products to buy and how to use them can be overwhelming for many parents.

The Safety Store at Children's Hospital Colorado was created to improve the health and well-being of Colorado kids by offering families safety products and individualized prevention education. We are pleased to offer a wide selection of products available for

transportation safety (including car seats), bike and pedestrian safety, infant safe sleep, fire, and home safety. Staffed by knowledgeable and experienced safety experts, the Safety Store offers families tailored education and "one-stop" shopping at prices at or below online and traditional retailers. Parents receive customized product recommendations based on their child's age and stage of development, the home environment, and their transportation needs. The Safety Store is also a designated child passenger safety inspection station, where parents can schedule a free appointment to have their car seats checked for proper use, installation, and recall history.

For every purchase made at the store you will be contributing to life-saving efforts currently underway throughout Colorado, as 100% of the proceeds from the store are reinvested in Children's Hospital Colorado's injury prevention education and outreach initiatives.
